WINDOWS
™

Strength and Durability

Just when you thought windows could only be clad in metal. The Westeck Combo™ Window partners the natural richness of an all wood interior with a fully extruded vinyl exterior. This new concept in window design delivers the best of both worlds. Proven exterior durability with the beauty of an all wood interior.

Vinyl exterior with a full
VG Fir wood interior.
(No vinyl showing on interior)

Combo™ or Vinyl Clad Window

The Combo™ window provides the flexibility to integrate the Westeck standard vinyl casement collection with the Combo™ clad windows due to the perfect and balanced product exteriors. You can then choose Combo™ windows only where you would like to have these feature windows in your home, while in the basement, bathroom and garage, you may use the Westeck casement windows as a cost effective compliment. Choose from B.C. sourced mixed or vertical grain Douglas Fir or any other wood species to match your flooring or cabinets. Available with wood screens that come standard with Clearview mesh for added transparency and increased air flow.

- 25 STANDARD OR UNLIMITED CUSTOM COLORS
- 5 SIMULATED WOOD FINISHES AVAILABLE
- CONCEALED EXTERIOR HINGES COME STANDARD FOR IMPROVED AESTHETICS

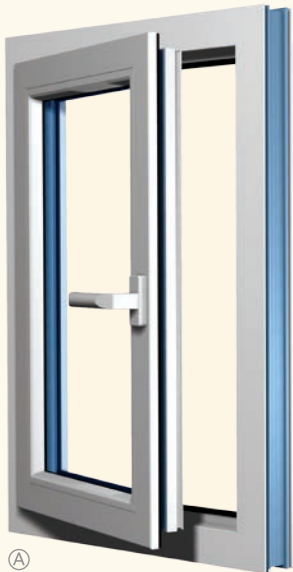

Strength & Durability

Our Euro Tilt/Turn series windows and doors are used in residential and commercial applications. Reinforced with galvanized steel allowing structural support for larger picture windows or for curtain wall applications.

Simulated divided lites, muntin bars or true divided lites are available for a more traditional look.

Safety

The unique European design of our Tilt/Turn series provides the diversity of dual action handles that allow windows to be ① fully open or ② restricted to a 'tilt' position for optimal safety and ventilation. This is ideal for second or subsequent floors.

①

②

Dual action handles allow for full opening egress casements with option of top ventilation.

TILT/TURN WINDOWS

Euro Tilt & Turn Windows

Whether you are working toward a sleek contemporary design or striving to preserve historical accuracy, add interest and drama to your project by utilizing custom architectural shapes. These fixed or operable units can be used alone or be mulled to standard configurations to create a wall of light or simply a focal point.

Metal Clad Windows

Westecks Aluminum Clad Wood windows offer the extreme strength and durability of low maintenance, exterior aluminum frame with the beauty and warmth of naturally insulating wood on the interior. A modern Westcoast style window system that only utilizes thick extruded aluminum and solid wood profiles.

All of Westeck's Aluminum Clad Wood windows are built specifically for your home and will complement any room. We also offer a wide range of design possibilities including color, decorative glass, wood, screen and hardware options to make your windows unique and personal.

Metal Clad Doors

With the stability and strength of an LVL core wrapped with a heavy extruded aluminum, this combination virtually eliminates any cupping or bowing while keeping the stile and rails uniformly straight, flat and true. These doors are available in all of our standard colors as well as any custom color of your choice. We also factory stain the interior of these doors to suite your specific design requirements.

Shapes

At Westeck, we like to make windows that are just a little different. Arches, raked windows, parallelograms, oval, and round windows that open with custom SDL patterns, matching brickmould or renovation flanges. If you or the architect can design it, our specialty department can most likely build it.

Renovation Accessories

Westecks renovation department specializes in helping you choose the right window and renovation accessory for ease of installation. We offer 5 different flanges and brickmould options, a vinyl sill, and a vinyl composite jamb liner. All of these can be painted to match the rest of your windows and doors.

Patio Sliding Doors

Westeck offers three distinct patio sliders to fit your design, performance and budgetary needs.

The K2 Slider is a high performance North American styled slider that is flexible in design and size while meeting the highest in performance criteria. The self-actuated handle set offers a superior aesthetic and designer appeal while providing advanced ease of operation and security.

The Euro styled Tilt/Slide Doors can operate in three positions: closed, tilt and slide. The tilt function is an excellent option for ventilation while the panel is in the closed position. Door or sash weights of up to 200kg can easily be operated with one hand. The locking mechanism is provided with driven stay arms pulling the sash towards the frame evenly when closing and pushing it off when opening.

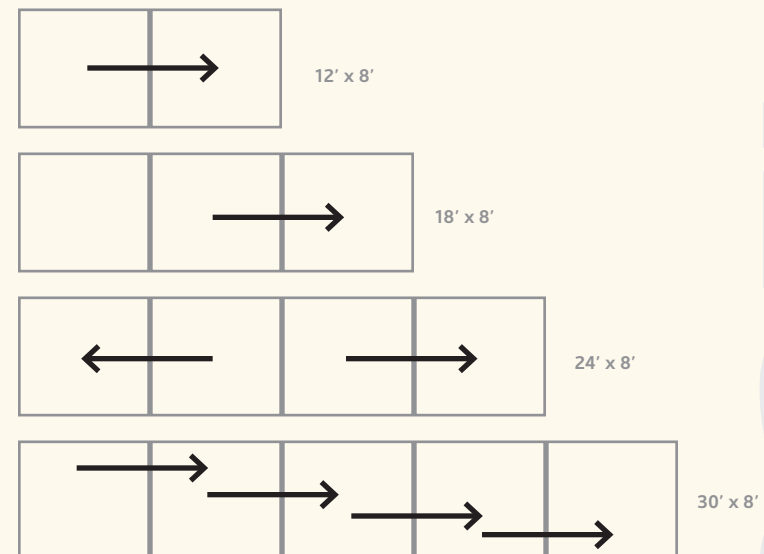

Lift/Slide Doors are widely used in top class building structures, such as villas, luxurious or boutique hotels, premium quality condominiums and custom homes. With the ability to move very large panels of glass this is an excellent option to dramatically take advantage of view locations.

Westeck Folding Door Systems

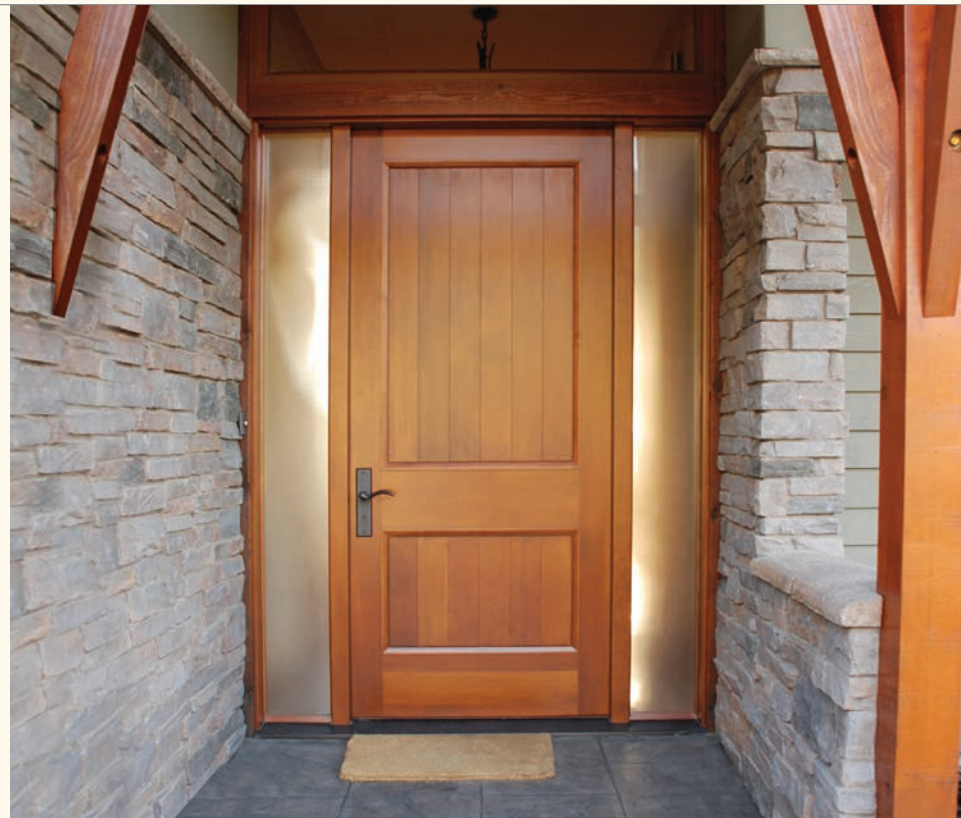

Allow the outside in. These door systems are available in almost any configuration in wood, metal clad, and fiberglass. These doors are perfect for opening corners and radius units, allowing for a continuous view.

ENTRY DOORS FRONT

Your Front Entry

Your front entry door unit should make a statement about you and your home. We have a multitude of standard door styles and panels to choose from or you can design your own.

Douglas fir is standard for our front entry units, but any species is available with a matching jamb and brickmould.

Choices

Entry doors must be durable enough to withstand wind, rain, scorching sun, and would-be intruders, yet make a good first impression. Choosing the right style and getting the right price is critical and with all the different species of doors to choose from, at Westeck we can help you design a door that will set you apart and one you can call your very own.

Make it Custom

With hundreds of different wood species and a multitude of glass styles available, why purchase the same door as your neighbor? Just by making a small change to the style of door and glass you choose and you can create a unique front entry that is one of a kind.

FRONT ENTRY DOORS

Woodstyle Homes, Vernon, BC

DOORS

French Doors

Whether you want your French doors to swing, slide, tilt & turn or tilt & slide all options are available in a many different door styles, grid option and sizes. Depending on the amount of space available in your home or on the deck, choosing the right door is critical to maximize your space and views.

Paint

Vinyl windows don't have to be white or beige anymore. Westeck's certified, in house application and twenty (20) year paint warranty now allows you to specify one of 25 standard colors or any custom color. Color may be applied on the "exterior only", (interior remains white or beige) or color in and out "full color"

Westeck specializes in painting your doors to match your windows.

MULTI-FAMILY

Multi Family & Light Commercial

Westeck's multi-family division works directly with the architect and builder to make sure their design of the building is met while insuring the structural integrity. Westeck's production plant not only produces these windows but also has their own testing facility, and as part of their procedure, randomly pull windows off the line and test them for air and water leakage as well as structural support and integrity.
